Positions & Education

Research Associate, Sander Kersten Lab, Cornell University

EMBO Postdoctoral Fellow, Kornfeld Lab, University of Southern Denmark 2021-2025

PhD, Molecular Nutrition, Wageningen University (Prof. S. Kersten) 2016-2020

MSc, Molecular Life Sciences, Wageningen University 2015-2016

BSc, Molecular Biology, Univ. of Aberdeen & Bonn-Rhein-Sieg 2010-2013

Research

How nutrition is recorded in the adipose epigenome, and how that record sets the body's capacity to store and burn energy - with consequences for metabolic health, aging, and resilience. Threads: ANGPTL4-LPL lipid handling; ketone-body signaling; dietary methionine-chromatin crosstalk in thermogenic fat (ChromaBAT).

Selected Publications

Ruppert PMM, Kersten S. Mechanisms of hepatic fatty acid oxidation and ketogenesis during fasting. *Trends Endocrinol Metab* (2024).

Ruppert PMM, et al. Fasting induces ANGPTL4 and reduces LPL activity in human adipose tissue. *Mol Metab* (2020).

Dijk W*, Ruppert PMM*, et al. ANGPTL4 promotes intracellular cleavage of LPL by PCSK3/furin in adipocytes. *J Biol Chem* (2018).
